CHECKLIST

Small-room desk setup checklist

- [ ] Measure the room width, depth and door swing before choosing a desk
- [ ] Mark radiators and sockets on a sketch or photo
- [ ] Add 80 centimetres behind the desk position for chair clearance
- [ ] Check that drawers and cupboard doors open fully without obstruction
- [ ] Position the desk perpendicular to the window to reduce glare
- [ ] Test the walking route from door to desk and desk to window
- [ ] Fix wall shelves into solid masonry or studs, not plasterboard alone
- [ ] Run cables along skirting boards with adhesive clips to avoid trip hazards
- [ ] Level the desk on uneven floors with adjustable feet or furniture pads
- [ ] Confirm the desk's weight capacity covers your monitor and equipment
